

ROADMAP 2.0

OPENSEA VERIFICATION

We hit OpenSea's requirement of 100 ETH traded on 4/14/22, so the next step is getting verified with the "blue checkmark" stamp of approval. Verified collections create trust, and can make Killabears more appealing to high-volume traders who only invest in verified collections. Our application has been submitted, and verification is in-process. We will update the community as soon as it's complete.

INTELLECTUAL PROPERTY

As an owner of a KILLABEARS NFT, you own the IP of the art. You may use the image as you wish, as long as you own that particular NFT. Use of the image for profit must cease upon sale of the NFT. Although the owner owns the IP of their bear, they do not own any KILLABEARS marks, logos or other art used – and therefore these can not be used for commercial purposes without written approval from the KILLABEARS team.

TEDDY WORKSHOP

Welcome to your TeddyBear Workshop! For each KILLABEAR NFT you hold, you will be able to design and mint a TeddyBear using both the traits of your Killabear, and some surprise traits which haven't been announced yet! A duplicates check will be put in place to make sure no two TeddyBears come out the same. Once designed, you will mint your Teddy as an NFT which will be added to the new TeddyBear collection.

As a KILLABEAR holder, your TeddyBear mints will be free (just pay gas). Along with the 3,333 Teddys created by holders, we'll hold a public mint for an additional 3,333 Teddys, bringing the collection to 6,666 TeddyBears. Once

minted, your Teddys will show up in your wallet, and can be traded instantly on OpenSea or LooksRare. A limited number of mint-passes will be given away prior to the public sale, which will offer a discounted mint price

PIXABEARS + METaverse

For each KILLABEAR NFT you hold, you'll be able to mint a free PIXABEAR. - a pixelated version of your Killas, which will be used in the Metaverse! (we are currently in discussions with Arcade.inc & Worldwide Webb for integrations)

After that, for a limited time, we will open this collection up to other minters - where, as a holder you'll be able to refer 3-5 people to mint a PIXABEAR, and earn 50% of the mint price. (Collection limit and mint price for non holders TBD.)

@El Sato is our amazing pixel artist who will be working on PIXABEARS with us. He is an old school pixel artist with a ton of great looking games in his portfolio. At Umbrella Games, we often engaged him to elevate the quality of our art on several of our titles which have reached Top 10 on the AppStore.

LOOT BOX

We will create a snapshot and allow all holders to claim one or more loot boxes filled with ETH prizes, discount deals, whitelist spots for other hot projects and even some exclusive NFTs. More details TBA soon!

STAKING + COIN

We are in the process of planning an innovative new staking system. This system will allow you to stake your NFT's from each collection and earn exclusive rewards that will be announced at a later date. This is not your average staking system, and we want to make sure everything is dialed in, to provide the highest possible value to stakers before putting this in place.
